### Reasons for Allowance

1) The following is an examiner's statement of reasons for allowance, which supplements applicant's arguments filed 11-3-03:

The prior art of record, including Aoki et al (US 5385189) and Koyama et al (US 6170546), whether taken singly or in combination, fails to disclose, teach or suggest:

(1) "the blocks of the central rows being separated from the blocks of the intermediate rows by a pair of longitudinal sipes" and

(2) "the first and second transverse grooves have centre lines converging in the direction of forward travel with ends on planes parallel to the equatorial plane of the tyre; the first and second transverse grooves have centre lines inclined in opposite directions to one another at a first angle with respect to a plane perpendicular to the equatorial plane of the tyre" and

(3) "a depth of the transverse grooves is equal to at least 95% of the thickness of the tread along the entire length of the first and second transverse grooves" wherein antecedent basis for the thickness of the tread is provided by "a tread with a predetermined thickness between a radially external surface of the tread and a radially internal surface of the tread in contact with the belt structure" in combination with the remaining limitations of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
